Dictionary-Based Learning*, Copyright © 2007 by Robert  
Oliphant, columnist, Education News**

Author of *The Latin-Old English Glossary in British Museum MS 3376*  
(Mouton, 1966) and *A Piano for Mrs. Cimino* (Prentice Hall, 1980)

## INTRODUCTION

Strictly speaking, this is simply a list of technical terms: 30,680 of them presented in an alphabetical sequence of 52 professional subject fields ranging from Aeronautics to Zoology. Practically considered, though, every item on the list can be quickly accessed in the Random House Webster's Unabridged Dictionary (RHU), updated second edition of 2007, or in its CD – ROM WordGenius® version. So what's here is actually an in-depth learning tool for mastering the basic vocabularies of what today can fairly be called American-Pronunciation Internationalist High Tech Latinate English.

**Dictionary authority.** . . . This list, by virtue of its dictionary link, has far more authority than a conventional professional-subject glossary, even the one offered online by the University of Maryland Medical Center. American dictionaries, after all, have always assigned their technical terms to professional experts in specific fields, identified those experts in print, and in effect held them responsible for the accuracy and comprehensiveness of each entry. Even more important, the entries themselves offer learners a complete sketch of each target word (headword).

**Memorization.** . . . For professionals, memorization is a basic career requirement. Any physician will tell you how much of it is called for in medical school and how hard it is, thanks to thousands of strange, exotic shapes like <myocardium> that have to be taken apart in the mind and reassembled like pieces of an unpronounceable jigsaw puzzle. Hence the need for multiple memory-friendly clues. Pronunciation, etymology, definitions, root elements (including cross references) — these features ensure that each target word visited has a far greater chance of sticking in a learner's mind than does a bare bone headword-definition glossary entry

**Testing.** . . . Diplomas and degrees are still important in a career-mobility world economy. But so, more and more, is the need for high stakes tests as tools for validating and revalidating academic achievement, many of which emphasize the kind of high tech vocabulary power represented by a dictionary-based question like, "Please identify (via spoken or written spelling) the 10-letter word represented by the phonetic transcription /muy' euh kahr"dee eum/ and the dictionary definition <the muscular substance of the heart>."

Practically considered, this list represents 30,680 high-powered spelling bee questions like this, along with the same number of pronunciation questions like, "Please indicate which syllable (1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup>, or none of these) gets the primary stress in the dictionary entry for <myocardium>" or "Please produce a dictionary-accurate phonetic transcription for <anemia>."

**Range and importance.** . . . Professionally considered, what's here is far more representative than comprehensive; the 28<sup>th</sup> edition of Steadman's Medical Dictionary, for instance contains 107,000 entries, noting that 80% of them contain one or more Latinate English root elements out of a relatively small pool of 1,200. By way of indicating the relative professional importance of our 52 fields, here they are, ranked by the number of entries for each in RHU. They range from 3,389 entries down to 73, with an average size of 590.

**RHU subject-fields and their number of entries.** . . . chemistry3389/ pathology2113/ law2109/ music1434/ botany1324/ mathematics1289/ physics1289/ nautical1252/ anatomy1138/ biology1011/

**Independent learning.** . . . From autodidacts like Franklin and Lincoln on down to an aspiring medical student in Ethiopia, wise learners have always stayed clear of taking on discouraging challenges like, say, all 944 of our medical terms. By way of encouraging contrast, here's a procedure that worked quite well in the early stages of this project.

- 1) Define a preliminary subgroup.... Nine-letter words like <myelogram> tend to have only one definition, as opposed to shorter words like <active>, which has 22 separate definitions listed and numbered, of which only number 14, "acting quickly, producing immediate effects," is identified in italics with the abbreviation <Med.>, for "medicine."
- 2) Eliminate target words that don't appear in your family's desk size dictionary (1000-1500 pp.). This step reduced the first-step list of 65 to 35, and the checking process produced a high level of target familiarization.
- 3) Check each target word's four clues (pronunciation, etymology, definition, and cross referenced root elements) as quickly as possible. This took two sessions totaling 35 minutes — one minute per target word.
- 4) Take a spelling bee-style test using a desk dictionary in the hands of a friend or family member and be satisfied with a 70% success rate. . . . With only one minute per word of actual study time, almost every learner's success rate is bound to be surprisingly high and encouraging — enough so to inspire further effort and test-taking success.
- 5) Continue to challenge yourself and check your progress. . . . Dictionary based tests, just like counting calories consumed via a stationary bicycle, will keep you honest. But your morale will climb if you measure yourself via conventional vocabulary tests like those offered by preparation manuals (available in libraries and bookstores, for our major pre-professional tests, GMAT, GRE, LSAT, and MCAT. More informally, you can try reading general-interest books in your chosen field and see how much sense they make to you personally, since preexisting vocabulary power has always been a major factor in determining how fast we read — and how retentively.

**TO CONCLUDE.** . . . As indicated at the outset this access dictionary is just a door opener, not the main show, which is the English vocabulary itself: its pronunciation system, its spelling system, its root elements, and the logic of its multiple meaning system. By way of underscoring the point, simply imagine a friend asking you what's so important about the English vocabulary (EV), in which case here are seven points you might make — even to a group of third-graders.

The EV is Etymological. . . . This is to say that nearly all of our words can be traced back to an original source, just like a family tree, including their relationships to words in other languages (cognate cousins, we might call them).

The EV is Normative. . . . It's true that every family has its own language in a sense (nicknames, bathroom functions, etc.), and so does every neighborhood and geographical region. But a dictionary like the RHU is meant to hold a nation together by setting standards or norms, for spelling, for pronunciation (e.g., TV announcers), and even for word-meanings (e.g., its use in legal proceedings).

The EV is Gigantic. . . . Matched against even a desk-size dictionary (70,000 word entries), our personal best vocabularies are relatively small: 15,000 for high school graduates going on up to possible as high as 30,000. But overall the contents of our unabridged dictionaries are the largest on the planet: over twice the size of German or French, for example.

The EV is Latinate. . . . Even in a desk-size dictionary 80% of the headwords are explicitly designated, directly or indirectly, as coming into the language from Latinate sources: French, Italian, Spanish, and renaissance Graeco-Latin. Only 10% go back to the "old English" of before 1066 A.D. (the Norman conquest). The remaining 10% come from languages of northern Europe, especially Norse and Dutch, and from other contributors: American Indian, Asian, Arabic, African, etc. In unabridged dictionaries, including Merriam Webster and the Oxford, the Latinate element can be fairly estimated as 90%.

The EV is International. . . . Time Almanac 2007 lists 41 nations in which English is explicitly identified as an official language, 24 where it is the first alternative language listed, and 26 where it is listed as one of two or more acceptable alternatives (the United States and the United Kingdom are in this category). These figures mean that right now over three billion human beings live in nations where English is spoken, taken seriously, and studied.

The EV is Scientific. . . . Culturally considered, the roughly 5,000 separate languages on our planet are all equal. But for publishing the results of original scientific research, as Charles ("diglossia") Ferguson and others have noted, less than ten fall into this category, the most frequently used is English — especially with American-style pronunciation.

The EV is Hard-to-Learn. . . . While English grammar and pronunciation are no more difficult than those of Tagalog, Chinese, or Swahili, our Latinate English component is a memorization nightmare for every student, American or foreign-born, on Planet Earth. Practically considered, this means that our professional vocabularies are EQUALLY difficult and thus equally accessible for everybody, not just a favored few. Simply put, most of us can't do much about our appearance or athletic talent, but we can all improve our vocabulary power — and feel proud of ourselves in the process

.  
Etymological, Normative, Gigantic, Latinate, International, Scientific, and Hard-to-Learn — put together (as most readers and listeners usually guess about halfway through) the initial letters of these seven key features spell E-N-G-L-I-S-H. . . . Here's hoping this 7-point speech outline sticks in your memory, along with the personal-growth target words you decide to access via the following dictionary-based list.

**An access-list of 30,680 technical terms.**

NOTE. . . . RHU entries for the following headwords identify their technical definitions via italics, e.g., *Aero*. (for “aeronautics”) or *Aerospace*. In a few instances, italics are not used, e.g., using the field-indentification word as part of a term’s definition. Homographs (different words who share the same spelling) are distinguished by superscript numerals.

AERONAUTICS	bulkhead	GCA	pushover
abeam	bump	glide	pylon
absolute altitude	bungee	glide slope	radial engine
absolute ceiling	burble	ground1	rake3
aerodynamic wave drag	buzz1	ground-controlled approach	rate-of-climb indicator
aeroelastic	cabane	ground loop	reaction engine
aeroelastics	camber	groundplot	reheating
aeromarine	canard	guide rope	resojet engine
aeropause	cantilever	gyro horizon	ride
aerosphere	ceiling	gyropilot	rigger
aerostation	cell1	hatch2	rigid
aft1	chandelle	heading	robot pilot
after	chord1	hole	roll-off
afterbody	climb indicator	horizontal stabilizer	rotary wing
afterburner	combustor	horn	rotor
afterburning	controller	hull2	rotor blade
aileron	control stick	IAS	rudder
aileron roll	corridor	ILS	ruddevator
airborne	crab1	inclinometer	run
air brake	crabbing	induced drag	sausage
airfoil	cradle	ingest	scramjet
airline	crash1	innage	seadrome
air log	critical angle	inside loop	semirigid
air plot	crow’s-foot	interference	servocontrol
airspeed indicator	cub	interference drag	sesquiplane
altitude chamber	dead-stick landing	jet wash	shoot1
angle of attack	deceleron	landing tee	shroud
angle of climb	dihedral	leading edge	skid fin
angle of pitch	distrail	leeway	skin friction drag
angle of roll	dive	let1	skiplane
angle of stall	dive brake	letdown	slat1
angle of yaw	dope	level	slip1
anti-G suit	downwash	level-off	slipstream
antitorque rotor	drag	lift	slot1
appendix	drift	lift-drag ratio	snap roll
approach light	drift indicator	liftoff	snap-roll
artificial horizon	drogue	lighter-than-air	span1
ASI	earth inductor compass	Link trainer	span loading
aspect ratio	elevator	loading	spar1
attitude	elevon	longeron	spin
automatic pilot	face	loop1	spinner
autorotation	feather	machmeter	spiral
axis1	FIDO	outage	split flap
back1	fin1	outside loop	spoiler
backswept	fineness ratio	panel	sponson
backwash	flame-out	parasite drag	spread
ballast	flap	peel1	stability
bank1	flaperon	permeability	stabilize
bank-and-turn indicator	flatten	pilot	stabilizer
bank indicator	Flettner control	pitch1	stagger
barrel roll	flight deck	Pitot-static tube	stall1
barrel-roll	flight indicator	plane1	stalling angle
bay2	flight strip	power dive	stator
beam	float	power-dive	statoscope
belly-land	floatplane	power loading	stick1
black box	flyby	pressure cabin	strip2
blowout	flying field	propeller wash	surface
body	flying wing	propfan	sweep1
bomb bay	Fowler flap	propjet	sweepback
boom2	Frise aileron	pulsejet engine	sweptback
boom3	fuselage	push-down	sweptwing
	gap	pusher	swing1

tab1	EMU	Viking	articulate
tail1	enterprise	window	articulated joint
tail plane	EVA		articulation
tail skid	explorer	ANATOMY	aryepiglottic
taxi strip	extravehicular	abdomen	arytenoid
thermal barrier	footprint	abducens nerve	ascending colon
three-point landing	G	aboral	association fiber
tractor	Galileo	accelerator	asternal
traffic pattern	heat barrier	accessorius	atlantal
trailing edge	heat shield	accessory	atlas
transonic	Hubble Space Telescope	accessory nerve	atrioventricular
trim	IAMAW	acetabulum	atrioventricular bundle
trimming tab	inertial guidance	Achilles tendon	atrioventricular node
trim tab	injection	acinus	atrium
turbo-propeller engine	insertion	acromion	attic
turboshaft	kosmos	-ad3	auditory
turn-and-bank indicator	launch vehicle	adenohypophysis	auditory canal
turn indicator	lunar excursion module	adnexa	auditory nerve
undershoot	lunar module	adrenal gland	auricle
variable-pitch	Lunar Orbiter	adventitia	auricular
variometer	lunar rover	air cell	auriculoventricular
vector	mariner	alar	axial skeleton
vertical stabilizer	mercury	alimentary canal	axilemma
V/STOL	midcourse	alveolar	axilla
VTO	mission	ameloblast	axillary
VTOL	mission control	amnion	axis1
warp	mission specialist	amniotic	backbone
wash	nimbus	amniotic fluid	ball-and-socket joint
washin	nominal	amphiarthrosis	band2
washout	OA0	amphicelous	Bartholin's gland
whipstall	OGO	ampulla	basal disk
windmill	orbiter	ampullula	basal ganglion
wind tunnel	OSO	amygdala	basilar membrane
wing	PAM	amygdaloid	basilic vein
winglet	parawing	anapophysis	basophil
wing loading	park	anastomose	belly
wingover	parking orbit	anastomosis	biauricular
wing skid	payload	anatine	biceps
wobble pump	phugoid	ankylosis	bicipital
yawmeter	pioneer	annular ligament	bile duct
	pressure suit	anteorbital	bladder
AEROSPACE	pressurized suit	anterior pituitary	blind spot
ablation	probe	anteroparietal	body
ablator	relay1	antihelix	bone
active	roll	antitragus	bony labyrinth
aero.	satelloid	antrum	bowel
aeronautical engineering.	separation	anus	Bowman's capsule
aerospace	service module	anvil	brachial
anti-G suit	Skunk Works	aorta	brachial plexus
Apollo	soft	aortic valve	brachiocephalic artery
apolune	solar sail	aponeurosis	brachiocephalic vein
Ariel	space capsule	apophysis	brachium
astronautical engineering.	space probe	appendage	brain
blastoff	Space Telescope	appendicular	brain cell
capsule	surveyor	appendix	breast
challenger	swing by	approximal	bridge1
characteristic velocity	synchronous	aqueduct	Broca's area
Columbia	Syncom	aqueduct of Sylvius	bronchi
command module	thruster	aqueous humor	bronchia
corridor	Tiros	arachnoid	bronchial
cosmodrome	Tracking and Data Relay	arborization	bronchiole
cosmos	Satellite	arbor vitae	bronchus
dead-stick landing	transit	area	brow
decay	translunar	arterial	browridge
deorbit	UAW	arteriole	brush border
discoverer	umbilical cord	arteriovenous	buccal
discovery	undock	artery	buccinator
drift	vane	arthrodia	buccolingual
early bird	vector	arthrosis1	bud1
echo	Vela		bulb

bulbourethral	clavicle	cup	epicardium
bulbourethral gland	clitoris	cystic	epicondyle
bullate	cnemis	dacryon	epicranium
bundle	cochlea	deciduate	epidermis
bundle of His	cochlear duct	decussation	epididymis
bursa	collateral	deferent	epidural
bursiform	collecting tubule	deltoid	epigastrium
calcaneus	colon2	dendrite	epiglottis
calcific	colonic	dendron	epimysium
calcification	colorectal	dentigerous	epineurium
calyx	comes	depressor	epiphysis
canaliculus	commissure	dermal	episternum
cancellate	common	dermatome	epithalamus
cancellous	common carotid artery	dermis	eponychium
canine	common iliac artery	descending colon	erectile
canthus	compressor	desmoid	erector
capillary	conchal	diaphragm	erythroblast
capitate bone	condyle	diaphysis	esophagus
caput	cone	diapophysis	ethmoid
cardia	conjunctiva	diarthrosis	Eustachian tube
cardiac muscle	connate	diencephalon	evrter
cardiovascular	connective tissue	digastric	exocrine
carotid	constrictor	dilator	extensile
carotid body	conus arteriosus	diploë	extension
carotid sinus	convoluted tubule	dissepiment	extensor
carpal	convolution	diverticulum	external
carpale	coracoid	dorsad	external auditory meatus
carpometacarpal	cord	dorsall	external iliac artery
carpus	corium	dorsalis	extraocular muscle
cartilage	cornea	dorsiflexion	extrapyramidal system
caruncle	corona	dorsiflexor	extravaginal
cauda	coronal	dorsispinal	extravascular
caudal	coronal suture	dorsolateral	extrinsic
cavitary	corona radiata	dorsolumbar	extrinsic eye muscle
cavity	coronary artery	dorsum	facet
cecum	coronary sinus	duct	facet joint
celiac	coronary vein	ductule	facial nerve
celiac plexus	corpus	ductus arteriosus	falcial
central	corpus callosum	duodenum	false rib
central sulcus	corpuscle	dura mater	false vocal cords
centric	corpus luteum	eardrum	falx
centrum	corpus striatum	ectad	fascia
cerebellum	cortex	ectal	fascicle
cerebral	cortical	ectocornea	fauces
cerebroid	costal	efferent	femoral artery
cerebrospinal	costate	ejaculatory duct	femur
cerebrovascular	cotyledon	elastic tissue	fenestra
cerebrum	cotylod	eminence	fiber
cervical	Cowper's gland	emissary	fibrocartilage
cervix	coxa	enarthrosis	fibula
chest	cranial nerve	encephalon	fillet
chiasma	craniosacral	endarterium	fissipalmate
cholecyst	cremaster	end bulb	fissure
chondral	crenation	endocardial	flection
chordl	crest	endocardium	flexion
chorda tendinea	cricoid	endocranium	flexor
chorioid	cricopharyngeal	endocrine	floating rib
choroid	crista	endoderm	foldl
chromomere	crural	endolymph	follicle
cilia	crus	endometrium	fontanel
ciliary	crypt	endosteum	foramen magnum
ciliary body	crystalline lens	endostosis	forceps
ciliary muscle	cubital	endostyle	forearml
ciliary process	cubitus	enterocoele	forebrain
cingulum	cuboid	enteron	fornix
circulatory system	cuffl	entopic	fossal
circumvallate	cul-de-sac	epaxial	fossula
cistern	cuneiform	epencephalon	fourchette
cisterna	cuneus	ependyma	frenulum
claustrum	cushion	epicanthus	frenum

frontad	hippocampal	knee	media2
frontal	hippocampal gyrus	knot1	mediad
frontal bone	hippocampus	Krause's corpuscle	median plane

 prick  
 puddle  
 quetsch  
 Riesling

root graft  
 rootstock  
 semihardy  
 set  
 shade-grown  
 species  
 specimen plant  
 sprig  
 standard  
 stock  
 STOL  
 stool  
 tea rose  
 thatch  
 Tokay  
 top grafting  
 topiary  
 train  
 truss  
 understock  
 whip-and-tongue graft  
 whip graft  
 youngberry

## LINGUISTICS

accusative	complement clause	functor	locutionary
acquire	complementizer	fusion	low-level
acquisition	component	<sup>1</sup>	marked
acrolect	componential analysis	gad	marker
adstratum	consonant shift	genealogical relationship	matrix
agglutinate	consonant system	generate	matrix sentence
agglutination	constative	generative	meaning
agglutinative	constituent structure	generative grammar	melioration
allocher	constraint	generative phonology	mesolect
allograph	contamination	generative semantics	middling
allomorph	<sup>1</sup>	generative-transformational	minimal pair
alternant	content	grammar	morph
alternate	contentive	genetic relationship	morpheme
alternation	context of situation	German	morpheme structure condition
ambiguous	contrast	glossematics	morphemics
analogy	conversational implicature	glosseme	morphology
animate	coreference	glottochronology	morphophoneme
anlaut	coreferential	glottogony	morphophonemic
anterior	coronal	Goidelic	morphophonemics
aphesis	corpus	grammaticalize	morphosyntactic
archiphoneme	cracknel	grapheme	morphotonemics
ART	creole continuum	graphemics	mutation
asterisk	culminative	graphology	neogrammarian
aughtlins	decreolize	Grassman's law	neutralization
auslaut	deep	Great Vowel Shift	node
autonomous phoneme	deep structure	Grimm's law	noncontrastive
autonomous syntax	delicacy	group	nondistinctive
AUX	demarcative	haplology	open
back formation	derivation	headlong	opposition
backlins	DET	hierarchy	overgeneralization
<sup>1</sup>	diachronic	hypercorrection	OV language
base	diachrony	hyperform	paradigmatic
basic vocabulary	dialect	hyperurbanism	paralanguage
basilect	dialect atlas	hyponym	pejoration
benefactive	dialect geography	hyponymy	pejorative
binarity	dialectology	idiolect	performance
binary opposition	discourse	ill-formed	performative
biolinguistics	discourse analysis	illocutionary	perlocutionary
biunique	discovery procedure	implicature	phoneme
biuniqueness	distinctive feature	inanimate	phonesthemic
blend	distributed	inflectional	phonetic law
Bloomfieldian	dominate	informant	phonological rule
branch	doublet	<sup>3</sup>	phonotactic
brandling	drift	-ing	phonotactics
break	emic	inlaut	phrase marker
by-form	equi	interference	phrase structure
calque	equi NP deletion	internalize	phrase-structure grammar
canonical	ergative	internal reconstruction	phrase-structure rule
case grammar	error analysis	intimate borrowing	phrase structure tree
categorial	ethnography of speaking	intuition	phylum
chamberlain	etic	isolate	polarity
chereme	expression	isolating	polar opposition
citation form	expressive	jer	pragmatics
cline	extrapose	Junggrammatiker	prime
cliticize	extraposition	karmadharaya	primitive
closed	factive	Kit-Cat Club	prosody
code	family	L1	proto-form
code-switching	family-tree theory	L2	protolanguage
cognate	focal area	language death	proxemics
coherence	form	language universal	rank scale
cohesion	formative	laryngeal	rankshift
collocate	fortition	left-branching	realize
collocation	fossilize	lenition	reconstruct
comment	free form	level	redundancy
communicative competence	free variation	lexeme	redundant
commutation	front	lexicalize	reflex
comparative method	functional	lexicon	register
compensatory lengthening	functional load	lexicostatistics	relexify
competence	functional sentence	lexis	relic area
complementary distribution	perspective	linguistic area	resumptivepronoun

# PHARMACY

Accutane	antifebrin	betamethasone	chlorpheniramine
acebutolol	antifertility	betazole	chlorpropamide
acetaminophen	antigen	bethanechol	chlortetracycline
acetanilide	antihistamine	BHA	chlorthalidone
acetanisdine	antihistaminic	BHT	Chlor-Trimeton
acetazolamide	antihypertensive	bioequivalence	cholinolytic
acetophenetidin	anti-infective	biological	cholinomimetic
acetylcholine	anti-inflammatory	Biphetamine	chorionic gonadotropin
acetylcysteine	antimanic	bitters	chrysarobin
acetylsalicylate	antimetabolite	bleomycin	chymopapain
acetylsalicylic acid	antimitotic	blue mass	cimetidine
Achromycin	antineoplastic	blue pill	cinchonidine
ACTH	antiphlogistic	bolus	cinchonine
actinomycin	antiproliferative	Bonadoxin	cinole
actinomycin D	antipruritic	booster	cisplatin
acyclovir	antipsychotic	boral	clavacin
adenosine arabinoside	antipyretic	boric acid	clemastine fumarate
Adrenalin	antipyrotic	botanical	clindamycin
adrenaline	antiscorbutic	bretylum	Clinoril
Adriamycin	antitussive	broad-spectrum	clofibrate
Advil	APC	bromal	Clomid
agent	apomorphine	bromide	clomiphene
agonist	Apresoline	bromocriptine	clonazepam
Albamycin	aqua	brompheniramine	clonidine
albuterol	ara-C	Brompton mixture	clorazepate
Aldomet	araroba	B.S.P.	cloxacillin
aliquot	Argyrol	bufotenine	cocaine
alkaloid	aromatic spirits of ammonia	bufotoxin	<sup>1</sup>
alkylating drug	arsphenamine	bupivacaine	cocktail
allantoin	asparaginase	busulfan	codeine
allopurinol	aspirin	butabarbital sodium	cohobate
aloin	assay	Butazolidin	colchicine
alpha blocker	Atabrine	butorphanol	colchicum
alpha-interferon	Atarax	butylated hydroxyanisole	colicin
alprazolam	atenolol	butylated hydroxytoluene	colistin
aluminum glycinate	atropine	butyrophenone	colocynth
amantadine	auranofin	cachet	Compazine
amikacin	Aureomycin	caffeine	confection
amiloride	Avertin	calcitriol	corpus luteum
aminoglutethimide	azathioprine	calcium blocker	cortisol
aminoglycoside	azidothymidine	calomel	cortisone
aminophylline	AZT	camphor	Coumadin
amiodarone	bacitracin	camphorated oil	cromolyn sodium
amitriptyline	bactericide	Caplet	cyclandelate
ammonium chloride	Banthine	capsule	cyclazocine
amobarbital	barbital	captropril	cyclizine
amoxicillin	barbitone	carbamazepine	cycloheximide
amphetamine	barbiturate	carbenicillin	cyclophosphamide
amphotericin	batrachotoxin	cardiac glycoside	cyclopropane
ampicillin	BCNU	cardioaccelerator	cyclosporine
amrinone	bebeerine	cardioactive	cyproheptadine
amygdalin	beclo-methasone	carisoprodol	cytarabine
amyl nitrite	belladonna	carmustine	cytosine arabinoside
Amytal	Benadryl	carron oil	cytotoxin
anethole	Bendectin	cefalor	dacarbazine
Antabuse	Benedict's solution	cefaxlor	dactinomycin
antagonist	Benemid	cefoxitin	Dalkon Shield
antarthritic	benzamine	cephalexin	Dalmane
anthelmintic	Benzedrine	cephalosporin	danazol
antianxiety drug	benzenecarboxylic acid	cerate	dantrolene
antiarrhythmic	benzocaine	charta	dapsone
antibiotic	benzodiazepine	chartula	Darvon
anticholinergic	benzoic acid	chloral	Darvon Compound
anticholinesterase	benzonatate	chlorambucil	DDS
anticlotting	benztropine mesylate	chloramphenicol	Decadron
anticoagulant	benzyl benzoate	chlorcyclizine	Declomycin
antidepressant	berberine	chlordiazepoxide	decoction
antidiuretic	Betadine	chloroform	decongestant
antiemetic	betaine	Chloromycetin	demeclocycline
antifebrile		chloroquine	Demerol
		chlorothiazide	

deoxycorticosterone	emulsion	gonadotropin releasing hormone	Intropin
Depo-Provera	energizer	gramicidin	inunction
deserpidine	enflurane	griseofulvin	investigative new drug
desipramine	ephedrine	G-strophanthin	iodophor
desmopressin acetate	epidural	guaiacol	ipecac syrup
DET	epinephrine	guanadrel	ipratropium bromide
dexamethasone	Epsom salt	guanethidine	iproniazid
Dexamyl	Equanil	Gynergen	isoamyl nitrite
Dexedrine	ergonovine	halazepam	isocarboxazid
dextran	ergot	Haldol	isoflurane
dextroamphetamine	ergotamine	half-life	isoniazid
diacetylmorphine	ergotin	haloperidol	isonicotinic acid hydrazide
diamorphine	ergotoxine	halothane	isopropyl meprobamate
Diamox	Ergotrate	hard drug	isoproterenol
diazepam	erythritol	heparin	isosorbide dinitrate
diazoxide	Erythrocin	heroin	isosterism
dibucaine	erythromycin	hexamethonium	isotonic sodium chloride solution
dicoumarin	Esidrix	hexylresorcinol	isotretinoin
dicumarol	estradiol	histaminase	isoxsuprine
dicumarol	estrin	histamine	juniper tar
diethylcarbamazine	estriol	histamine blocker	kainic acid
diethylpropion	estrone	Holocaine	Keflex
diethylstilbestrol	ethacrynic acid	hormone	ketamine
diethyltryptamine	ethambutol	Humulin	ketoconazole
di flunisal	ethchlorvynol	hyaluronidase	labetalol
digestant	ether	hydantoin	Lanoxin
digitalin	ethinamate	hydnocarpic acid	lb. ap.
digitoxin	ethionamide	hydragogue	L-dopa
digoxin	ethosuximide	hydalazine	levodopa
dihydroergotamine	ethyl aminobenzoate	hydrastine	levorphanol
dihydromorphinone	ethylenediaminetetraacetic acid	hydrastinine	Librium
dihydrostreptomycin	ethyl nitrite spirit	hydrochlorothiazide	lidocaine
dihydrotachysterol	etorphine	hydrocortisone	lignocaine
Dilantin	eucaine	HydroDiuril	lime liniment
Dilaudid	eugenol	hydroxychloroquine	lincomycin
diltiazem	eusol	hydroxyurea	liquor
dimenhydrinate	excipient	hydroxyzine	lithium
dimethyltryptamine	exhaust	Hygroton	lobeline
dinitrophenol	expectorant	hyoscine	Lomotil
diphenhydramine	eyewash	hyoscyamine	long-acting
diphenoxylate	Feldene	ibogaine	Loniten
diphenylhydantoin	fenfluramine	ibuprofen	loperamide
dipyridamole	fenoprofen	ichthammol	lorazepam
disopyramide	fen-phen	Ichthyol	lotion
dispense	fentanyl	ICSH	LSD
disulfiram	Feosol	idoxuridine	Luminal
Diuril	ferrous sulfate	IL-2	lysergic acid diethylamide
divinyl ether	fertility drug	Iletin	mafenide
Dobell's solution	flowers of sulfur	Ilotycin	magistral
dopamine	flucytosine	imipramine	magma
Doriden	fluidextract	immunosuppressive	maintenance
Dover's powder	flunitrazepam	Imuran	major tranquilizer
doxepin	fluorouracil	incompatible	mannitol
doxorubicin	fluoxetine hydrochloride	incrassate	mannitol hexanitrate
doxycycline	fluphenazine	IND	marc
Draize test	flurazepam	indapamide	margin of safety
Dramamine	folinic acid	Inderal	Marsilid
droperidol	formic acid	Indocin	mass
1	formulary	indomethacin	masticatory
drug	fructose	inert	MDA
Dyazide	furazolidone	infusion	mebendazole
ecbolic	gallamine triethiodide	INH	mechlorethamine
ED	Gantrisin	inositol	meclizine
50	gentamicin	inscription	medroxyprogesterone
edetate calcium disodium	gentisic acid	insulin	mefenamic acid
edrophonium	gitalin	interferon	Mellaril
EDTA	glutethimide	interleukin 2	mellite
electuary	glyburide	internal	mellitum
elixir	glycerite	international unit	menadione
ellagic acid			
emetine			

menthol	neuroleptanalgesia	phenobarbital	pyrimethamine
meperidine	neuropharmacology	phenolphthalein	Quaalude
meprobamate	niridazole	phenothiazine	quassia
